On-Page SEO Results

Your On-Page SEO could be better

Your page has some level of On-Page SEO optimization but could be improved further. On-Page SEO is important to ensure Search Engines can understand your content appropriately and help it rank for relevant keywords. You should ensure that HTML Tag Content is completed correctly and align text content to target keywords.

Title Tag

You have a Title Tag, but ideally it should be between 50 and 60 characters in length (including spaces).

Midwess - Software Development Studio

Length : 37

Title Tags are very important for search engines to correctly understand and categorize your content.

Meta Description Tag

Your page has a Meta Description Tag however, your Meta Description should ideally be between 120 and 160 characters (including spaces).

Midwess builds high-performance, secure software that empowers teams to innovate without friction. Software development studio specializing in modern web applications.

Length : 167

A Meta Description is important for search engines to understand the content of your page, and is often shown as the description text blurb in search results.

SERP Snippet Preview

This illustrates how your page may appear in Search Results. Note, this is intended as a guide and Search Engines are more frequently generating this content dynamically.

Usability

Your usability could be better

Your page is OK but could be more usable across devices. Usability is important to maximize your available audience and minimize user bounce rates (which can indirectly affect your search engine rankings).

Device Rendering

This check visually demonstrates how your page renders on different devices. It is important that your page is optimized for mobile and tablet experiences as today the majority of web traffic comes from these sources.

i

Google's Core Web Vitals

Google is indicating that they do not have 'sufficient real-world speed data for this page' in order to make a Core Web Vitals assessment. This can occur for smaller websites or those that are not crawl-able by Google.

Use of Mobile Viewports

Your page specifies a Viewport matching the device's size, allowing it to render appropriately across devices.

Google's PageSpeed Insights - Mobile

Google is indicating that your page is scoring poorly on their Mobile PageSpeed Insights evaluation.

Note that this evaluation is being performed from US servers and the results may differ slightly from an evaluation carried out from Google's PageSpeed Web Interface as that reporting localizes to the region in which you are running the report.

Google has indicated that the performance of a webpage is becoming more important from a user and subsequently ranking perspective.

LAB DATA	VALUE

Performance Results

Your performance could be better

Your page's performance has some issues and room for improvement. Performance is important to ensure a good user experience, and reduced bounce rates (which can also indirectly affect your search engine rankings). We recommend addressing the highlighted factors below.

Website Load Speed ✓
Your page loads in a reasonable amount of time.

Server Response

All Page Content Loaded

All Page Scripts Complete

Website Download Size

Your page's file size is quite large which, regardless of other optimizations, can reduce load speed and impact user experience.

A general rule is to keep your page under 5MB in total file size.

Download Page Size
